POKER WAR

How it works:

Start by placing the Ante Wager and one, two, or three optional War Wagers.

Players are dealt two cards - one face down and one face up - to use for War. Dealer is dealt three hole cards, then five community board cards.

The first, second, and third flop cards are revealed in order to resolve the one, two, and three War Wagers. High card wins even money - ties lose.

Player Deuce: Dealer will return War Two and War Three if played.

After War is complete, the final two board cards are revealed and the player will set their best five card poker hand.

Call: Keep your cards and stand.

Draw: Discard one card and receive one new card, face down.

Call-Draw: Must equal ante.

Fold: End the game.

Beat the dealer and win according to posted pay table, ties push.

See dealer for additional game rules.

If you or someone you know has a problem gambling, call 1-800-522-4700.
